PROJECTS

QUIKY APP
- React Native with Expo CLI, React JS, Node JS, Express JS, MongoDB, JWT, Google Map, Heroku.

Quiky App is a mobile application built to solve people's day-to-day problems by providing a vast range of services and products. Everyone can register in the system and publish their requirements or problems via the app. So, others can help to provide the required solutions.

HOSPITAL MANAGEMENT SYSTEM
- Java, MySQL

This system is developed with the purpose of digitizing the workload of the hospital. Doctors, ward staff, nurses, pharmacists and patients in the hospital can do their tasks efficiently and quickly with this system.

COURIER MANAGEMENT SYSTEM
- HTML, CSS, PHP, Bootstrap, MySQL

This web application enables package senders and receivers to collaborate with travel and tourism services to deliver packages while minimizing the high costs of cross-borders and low efficiency in traditional delivery systems.

WORKMATE
- C++, SQLite

A simple project management system that allows organizations to manage their employees and projects. Cross-platform functionality. Facilitates the job roles of CEO, Managers and staff members.

BILLING SYSTEM
- C#, MS SQL

An application for the smart shopping cart. It includes features such as barcode reading, card payments, bill generation and message alerting facilities.
